

# mPowerASP

Groupware Anywhere, Anytime!

**m-PowerASP** from IT Solutions is an easy to use, secure and reliable method of extending the functionality and content of corporate groupware servers to the mobile user.

Designed to be cost effective for low numbers of users, typically between 1 and 20. This service enables the small to medium enterprise to harness the true power of mobile computing without any of the technical challenges.

Simply sign-up for **m-PowerASP** today and you can begin accessing your email (including most attachments), contacts, tasks and calendar wherever and whenever you need.

It really couldn't be simpler to get connected, there's a one off connection fee followed by low monthly subscriptions. The connection fee includes everything you need to get started\*, including PDA and the **m-PowerASP** agent installation and configuration. If necessary, we can also arrange to upgrade your mobile handset to a suitable model and airtime plan.

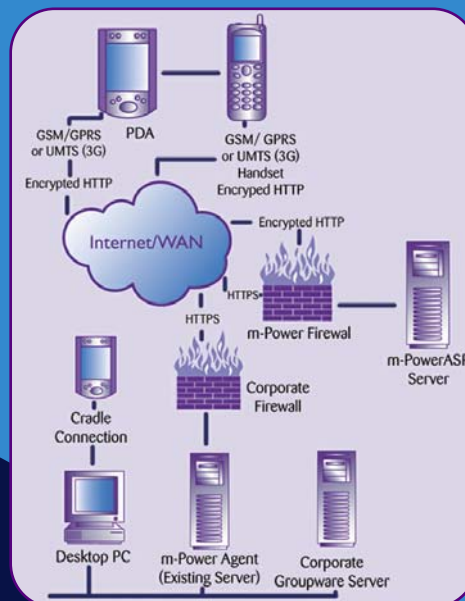

\*excludes mobile phone upgrade costs if applicable and ongoing airtime charges from your airtime provider.

## Features at a glance:

- Access corporate groupware servers on mobile PDAs, anywhere, anytime.
- Send & receive email, book meetings update contacts and manage tasks, anywhere, anytime.
- Smart attachment management, filtering and conversion.
- Synchronise PDAs wirelessly with corporate Groupware servers using highly secure connections locally or remotely via Cradle, WiFi, Bluetooth, GSM, GPRS or UMTS (3G).
- Synchronise automatically in unattended mode to a schedule that you define.
- Full support for both Exchange and Lotus Notes Groupware Servers.
- No Server based hardware required; we simply install our agent on an existing server and publish it securely to our hosted service through an existing firewall.
