

mPowerGroupware

Groupware Anywhere, Anytime!

m-PowerGroupware from IT Solutions

is an easy to use, secure and reliable method of extending the functionality and content of corporate groupware servers to the mobile user.

Designed to be cost effective for medium to large numbers of users, typically 20 upwards. This service enables the medium to large enterprise to harness the true power of mobile computing without any of the technical challenges.

Simply sign-up for m-PowerGroupware today and you can begin accessing your email (including most attachments), contacts, tasks and calendar wherever and whenever you need.

It really couldn't be simpler to get connected, all m-PowerGroupware packages include everything you need to get started*, including the PDAs and the m-PowerGroupware server installation and configuration. If necessary, we can also arrange to upgrade your mobile handset to a suitable model and airtime plan.

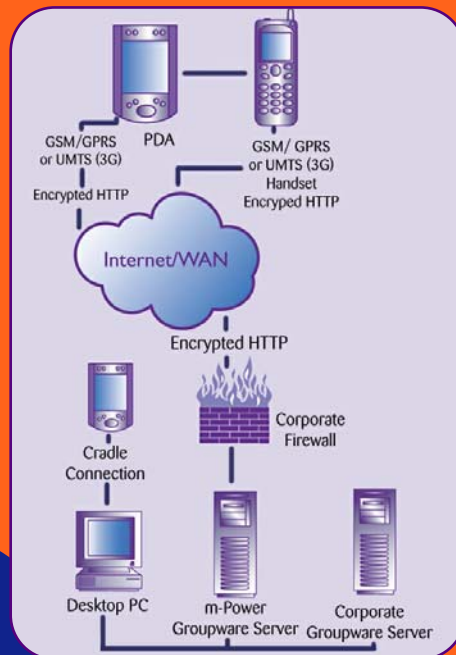

*excludes mobile phone upgrade costs if applicable and ongoing airtime charges from your airtime provider.

**Less than 20 users?
No problem, just ask us
about m-PowerASP.**
